ELLIOTT MURPHY

party girls ♡ broken poets

Originally released only in Europe, this 1984 recording showcases the remarkable talents of one of America's most incomparable and admired songwriters. Even though it was never released in the United States, *Party Girls/Broken Poets* was nominated for Album of the Year in the New York Music Awards. Many foreign and U.S. critics included the album in their Top Ten lists for the year. The album charted in the Top Twenty in several European countries. This reissue on **DEJADISC** marks the first time *Party Girls/Broken Poets* has been available anywhere in the world on compact disc. This release has been digitally remastered directly from Elliott's original two track masters. Both the CD and cassette feature brand new artwork, song lyrics and new liner notes by Elliott. In addition, both formats include two previously unreleased bonus tracks, "In A Minute" and "Everybody Knows (Niagara Falls)".
